

The InnoVoyce™ 300µm Laser Fiber

The InnoVoyce 300µm Laser Fiber is a revolutionary delivery system designed to enhance medical procedures by providing greater flexibility and control.

FDA-approved and compatible with the Aura™ 532nm KTP laser, the InnoVoyce 300µm fiber provides distinct clinical advantages for vocal health physicians and their patients.

Features

✓ **Smaller diameter** for easier insertion and fewer adjustments

✓ **Blue fiber cladding**

✓ **Elongated proximal connector** with improved strain relief

✓ **Compatible with both Pentax and Olympus** flexible endoscopes

Benefits

✓ Reduces discomfort and minimizes the risk of complications

✓ Improves visibility in the operating room, reducing the risk of accidental bumping, fiber breakage, and laser disengagement

✓ Provides a comfortable, safe grip while enhancing durability and stability

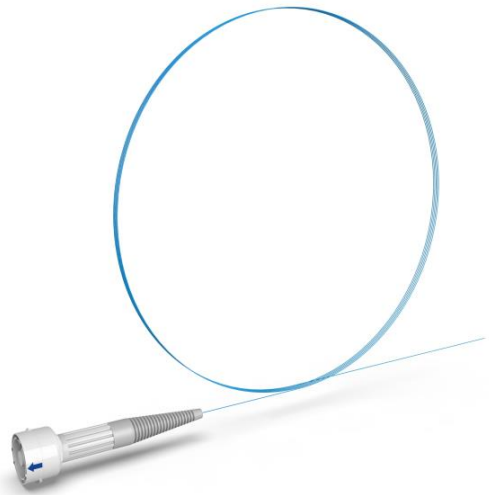

✓ Offers versatility for procedures, and a cost-effective solution

InnoVoyce is committed to providing cutting-edge medical technology to healthcare professionals. To order the **300µm Laser Fiber** or for more information about **InnoVoyce**:
